# EA707 Tabletop

**The EA707 is the uniquely designed wall mounted solution for the protection of your high demand security equipment**

Because of its modular structure, the EA707 ensures that your critical equipment maintains power, even in the event of component replacement; the maintenance bypass allows you to switch the UPS off without interrupting the power supply to any of the equipment connected to it.

Using the various software options, you will be able to monitor and log all events, as well as control your EA707 remotely. You will even be able to perform a controlled shutdown of any connected equipment in the event of a power failure.

# 3D

Creating a world you can step into

We're so used to seeing our world in 3D that we often don't realise how difficult it is to reproduce the fall of light and shadow, the subtle colour variations and depth of field that tell the brain where we are in relation to objects around us. Our 3D animation specialists are experts in working with these kinds of detail that create a world you can imagine stepping into.

Our Philosophy

The way we work

Our Brands

Our Practice

## The Art of Smiling

A **smile** costs nothing but gives much. It enriches those who receive without making poorer those who give. It takes but a moment, but the memory of it sometimes lasts forever. None is so rich or mighty that he cannot get along without it and none is so poor that he cannot be made rich by it. Yet a smile cannot be bought, begged, borrowed, or stolen, for it is something that is of no value to anyone until it is given away. Some people are too tired to give you a smile. Give them one of yours, as none needs a smile so much as he who has no more to give.

Watch the Story

And learn about our concept

## REPLICA ONE PIECE

The REPLICA is a highly advanced, off-the-rack, one-piece race suit, designed for the uncompromising rider who explores the limits. Grade-A leathers provide top-notch comfort, and the dual-comp shoulder part preserves freedom of movement while increasing the level of protection significantly. The REPLICA one-piece comes with a removable, washable, mesh inner-lining, as well as stretch inserts for additional comfort and flexibility.

### UNIQUE COMBINATION OF EXPERTISES

#### THE KEY TO FAST, COST-EFFICIENT AND SUCCESSFUL MARKET PENETRATION OF ELECTRIFIED VEHICLES

The EEMC offers a world wide unique combination of expertise and services for the hybrid and electric vehicles related industry. Along the complete product development process, the EEMC offers R&D, Engineering, Testing and Certification services on component, system and vehicle level for both heavy and light duty vehicles.

The key to fast, cost-efficient and successful market penetration of electrified vehicles (fully electric in particular) is a focus on three core areas: safety, performance and robustness. Finding the optimum balance between the trade-offs of those variables (or preferably
